WORKING ITS MAGIC

This is Paula. She is a Regional Financial Head for the European cluster and is responsible for managing and ensuring the spend is aligned with the Global Finance strategy and allocation.

The annual planning meet is right around the corner as part of which she has to prepare budget forecasts for all the cost centers. She can not only quote accurate forecasts per quarter, with Neeyamo Expense can also advocate it with reports detailing previous spend patterns across the centers and to what level of the same impact can be foreseen for the upcoming year. Best of all? she can access these reports at the click of a button!

Here's Harvey, a client partner plus globe trotter. He has multiple expenses like air tickets, client entertainment, car rentals, food, accommodation – just to quote a few! Typically, after a long exhaustive travel, he would have to raise these expenses under different budgets with approval requisition from at least 9 people.

Well, Harvey needn't wait that long! Here he is, checking out of the hotel just as he checks in the expenses incurred along with proof in the NW Expense mobile application. With automated workflows, the approvals are automatically pushed to the respective managers and budget owners. Go mobile, go live with Neeyamo.
